Category:MVS systems Category:Dealing with software bugsQ: Windows Azure Web Application for site hosted on Linux server My company is going to host a website on a Linux web server. I am looking for a good development platform to host the website in Windows Azure. Is it possible to setup a Windows Azure Web Application (beta) to access a website hosted on a Linux server? A: Yes it's possible. You just have to use some kind of IIS express or install an actual IIS on your linux server. I would recommend to use the IIS Express instead of deploying an IIS but this is totally up to you. You can find instructions here: [DIY Blackheads Face Mask](#) Ever have those days where you've got blackheads on your face or nose that refuse to disappear and just seem to fester? I've been there and it's a completely miserable experience. The one remedy I can never seem to get rid of is hot oil face masks. Well, I've got good news for you. That hot oil is no longer necessary when you use these blackheads face masks, which take the hassle out of pulling out your personal collection of blackheads face masks. Basically, a blackheads face mask works by mixing blackheads face mask ingredients in a bowl and then laying them on the nose. The mask then gets a few applications of the mixture to transfer it onto the skin. The ingredients then work to banish blackheads by providing the body with a moisture and sealant that combines to create a layer that prevents blackheads from forming or coming to the surface. With that said, here's a DIY blackheads face mask recipe that will help to banish blackheads overnight... [DIY Blackheads Face Mask](#) 2 tablespoons baking soda 1 tablespoon ground flax seed 3 teaspoons honey 1/4 teaspoon ground black pepper Mix all the ingredients together in a small bowl and then apply to the blackheads. Lay it on for about 10-15 minutes before rinsing off with warm water. The baking soda helps to soften the pores, the flax seed helps to plump up the pores to give a more natural look and a mixture
