Category:Android (operating system) devices Category:Mobile phones introduced in 2015At a Glance The safety and efficacy of a series of doses of thymopentin, an analog of thymopoietin, were compared with placebo in a randomized, double-blind, multicenter study. In a 6-month treatment period, the dose-dependent beneficial effects of thymopentin on all-cause discontinuation due to adverse events and treatment-related deaths were demonstrated. “Our findings demonstrate a relationship between higher dose levels of thymopentin and a reduction in all-cause discontinuation rates,” the authors conclude. “The beneficial effects of higher doses of thymopentin were dose-dependent in preventing all-cause discontinuation due to adverse events or treatment-related deaths. These results support further clinical development of thymopentin for the treatment of inflammatory and autoimmune diseases.” The study was funded by SmithKline Beecham.
