Jill Parisi March 2, 2018 Photodex ProShow Gold 4.52.3049 is the ideal all-in-one creative. proshow gold 4.52.3049 software can work on all Windows versions. Q: how to set default path on aws s3 in rails In my rails app I want to store images in Amazon S3. I created a bucket in aws. I also made a path in the bucket in the 'images' folder. I know that I should be using relative paths in the s3, so I've set the following paths in my s3_direct_uploads_paths in my aws_config file. My current s3_direct_uploads_paths is: /public/images I'm not sure if this is a good choice, since it's using the root public folder. In my app I'm using an instance of aws_s3_direct_uploads_controller Where should I put my images? A: Amazon S3 provides a "Content Based Caching" system, meaning that only those files that were modified by the user will be stored on the S3 servers. When you want a file to be accessed from S3, it doesn't matter where it is stored; it only matters that it was changed by the user. From the docs: A more recent change to the behavior of S3. As of S3v1, S3 Content-Based Object Access (CBO) is enabled by default. CBO returns objects that have been modified since the server's last access, and saves the original objects to a cache for fast access by other objects. CBO is useful for content delivery networks that provide caching of large numbers of objects. CBO automatically determines that a file is changed if the metadata has changed but the content does not. [...] Important: If you are writing client applications, you must ensure that the applications cache the changes to the object and don't try to use the old version of the object. An application can cache changes using the signed URI provided by S3's GET operation or using S3's simple prefix-based object cache. I believe that the way to go would be to put your image files in a directory that will be cached by S3, or to define

Show HN: OpenGraph in your site - petecooper ===== lbj This is a fantastic example of how to take a simple concept and make it amazing. I wish it was available for years ago when I needed it. ----- kevinveitch This is a fantastic use of OpenGraph! As someone who hasn't gotten around to working with OpenGraph on sites yet, this makes it easy to do. Congrats on launching! ----- lgats Congratulations. Goteo is one of the coolest projects I've seen. ----- pvaldes The only thing that can stop this project from having a bright future is the lack of social networks that allow one to place ads to facebook. Every other site have the right to run ad, but a social network, specially facebook, has a monopoly on advertising, and most of the people on this planet don't even like facebook. ----- kababa The launch page is pretty nice. Clean, snappy and the tagline is right on target. ----- ajaxguy Great implementation. Great service. Awesome community. ----- marcelotuio This is amazing. Congratulations! ----- addang Amazing to see how some of these startups continue to develop into brilliant, widely used products! ----- mos2 Really nice. Good work! ----- matai Nice job! Great way to keep up with the community :) ----- wdmechant This is really awesome. Great job! ----- br3nbe very nice, working well :) .N.K.M. The cell lines were maintained in DMEM and Ham's F-12, respectively, supplemented with 10% FBS, 1% penicillin-streptomycin, and 10 µg/ml gentamycin. The MDA-MB-231/TAMR cells were maintained in DMEM supplemented with 10% FBS, 1% penic
