Again (its a replica of each. It also sports a motorized instead of a manual zoom, much like the X-Pro2. The XX is our most premium compact camera and the new flagship APS-C model of the X-T2 is ideal for a wide range of professional and enthusiast photography. The only reason I have any doubts about this camera is the lack of a light meter on the top screen. Some photos

are not so pleasing - a bit flat, blueish or contrasty. I also picked it up to shoot on the go, and I don't have to carry much with me to do so. Not sure if

Canon will ever do this, but I am guessing that the sensor size is also not likely to change. Finally, because all the models of the X-Pro2 have the same sensor, and because it is based on a fairly recent technology, it is likely that the next model, the X-T3, will also use the same sensor. This is the plan for

this year with the new 20MP lens. I want to be able to shoot in difficult weather conditions, and I am surprised that the X-T2 does not have an eye-level electronic viewfinder. For a film camera it would have been pretty good. The camera comes with the cheaper X-T2 lens. It took some time before the first customer in Canada had his his X-T2 on our hands to test it.

Where does the X-T2 fit in the X-Series family? This camera is no secret, and is built on the same technology platform as the X-Pro2, X-E3, and the X-

T1. The X-T2 has the same sensor as all other X-Series cameras except the X-E2. The only real difference is that the sensor in the X-T2 has been trimmed down to 20.5MP in order to save battery. Even though the sensor is smaller, it is no less sensitive. It is also powered by a slightly improved DIGIC 6 processor, providing better low-light performance. Canon Rumors The lens will be a new version of the 21.1 MP f/, which is the same as on the X-Pro2 and X-T1. We are not sure about the field of view. We have been informed that the X-T2 does not have any kind of eye-level electronic viewfinder. Instead, it has the LV
