This report summarizes the anesthetic implications of the COVID-19 pandemic. As of May 3, 2020, when this report was prepared, the majority of the world had been affected by this new, deadly coronavirus. As of this writing, the global death toll is over 1 million. More than half the world's population has been affected by this global pandemic. There are no proven, effective treatments for this virus; but, there are medicines and equipment that can help to stabilize patients' underlying conditions while they undergo surgery and anesthesia. Anesthesiologists will be expected to address the needs of these patients during the current COVID-19 pandemic. package com.coremedia.iso.bboxes.apple; import com.coremedia.iso.bboxes.Box; import java.nio.ByteBuffer; public class AppleAcodecCPAudioPrivateData extends AppleAcodecCPAudioData { public static final String TYPE = "cpa"; protected ByteBuffer sbcEngineAudioData; public AppleAcodecCPAudioPrivateData() { super(TYPE); } protected long getContentSize() { return 8; } public long getContent() { return getContentSize(); } public void setContent(long content, content); } public void setContent(long content, long contentSize) { super.setContent(content, contentSize); } public long getContentSizeCheck() { return getContentSize(); } public void setContentSizeCheck(long contentSize) { setContentSizeCheck(contentSize, contentSize); } 2d92ce491b
