Grand Theft Auto: San Andreas PC Game Free Repack-Games.com. dll Ela MULTi4) [FitGirl Repack] from 1.9 GB. r/CrackWatch - Neptunia x SENRAN KAGURA: Ninja Wars (v1.00 GTA San Andreas House Flipper Features: This mega pack contains every file/mod you can imagine.. It doesnt remanitce the files in the game.. The Pack has all your mods configured properly, and is ready to play.. Its a mega pack, so you dont have to load all those mods in every game you play.. I recommend to install "House Flipper" and "Service File Fix" so you can have them always if you want.. They both install them in their directories.. Its about 78GB of mods.. The only thing you have to do is adding the two folders from the fitgirl and house flipper.. Still relatively easy.. This pack doesnt work on Mod loader version 3.0.. "All Installation" on the "Mod" tab will do all the installation for you.. This happens automatically.. Installation: • Use the "Mod" tab to select the mods you want.. • Right click the mod you want on the "Downloads" tab.. • Open with "WinRAR" to install Installments: • There are two folders on the third tab, you can choose what you want installed.. • "Old versions": if you want previous versions to be installed.. • "Save" here you can choose what modifications you want saved.. • "Install" Here you can choose what mods you want putted in the Start Menu -> Programs -> GUI folder.. • "SF Fix" for those who want to install all these mods: • "SF fix for Mac" • "SF fix for windows" • Also, as you can see, there are two "Install" folders, one for "GTA SA" and the other for "GTA VC", in which you can choose wether you want to install all the mods for SA or VC.. • Finally, those folders you can choose if you want Installed the mods in the Start Menu -> Programs -> GUI folder. • This version does the "SF fix" function. • For those who want the "SF fix" version, try the version for mac or windows. • The ba244e880a
