3x vehicle Engine Year: 2012 Engine: 4.0L V6 VIN: 68FS15B7SB141480 Interior Year: 2013 interior: interior 01 Transmission Year: 2013 Transmission: 6 Speed Automatic The truck pictured is a partial restoration of a 1966 GMC Custom 500 that we received in 2003. Prior to the restoration, the truck had the following history: It was built in 1972 in Mooresville, NC by BFI Enterprises. During the restoration, it was repainted in black and sealed with clear. It was then sanded, repainted in white and the interior was replaced with new seats, door panels, steering wheel, dash, and etc. It has always been garaged and has never been out in the weather. It was stored in a heated and air conditioned garage for 18 years. The overall condition was ok, the front suspension was good, the glass was ok, and the electronics were good. There was no leaks, no rust, and no dents. The rust in the gas tank is nothing to worry about, but the truck would need some rust repair on the floor. The gas tank is original so the mileage is about 700 miles. The suspension was good, the brakes were good, the wheels are straight, and the steering was ok. The truck had some minor defects in the drive train such as a bad upper connecting rod, a bad fuel injector, a bad seat belt, a bad battery, and a bad starter. The missing bolts are on the rear bumper. Winning Advice Extreme Offroad Mod for PC: . Extreme Offroad Mod for PC was created by AARO_VFX and its developer is NickVVV.
