While the basic principles of Chinese medicine have been in use for the last 2000 years, it was only in the mid-19th century that acupressure was born as an integral part of that system. It was then that acupressure was found to be a valuable adjunct to the other three major medical systems then in use in China, with a profound effect on treatment for a wide variety of ailments. Acupressure is a Chinese healing system that is widely practiced all over the world, even in Western countries. Originally, the two main acupressure points were recognized as the most effective, and these points were said to be “located on the forearm of the arm opposite to the site of the pain”. For some time, Western doctors and scientists tried to find the points on the arm, but with no success. The theory was that the acupressure points are located on
