Are there any plugins for Dreamweaver that will automatically convert png files to eps? I'm using Dreamweaver CC, and I've tried searching the web, but all I've found is that you can create a new EPS file with graphics from PSD files. A: Some free PDF editor can convert PNG/JPEG to PDF by processing the embedded text data and creating a PDF containing these texts. If it really means much to you, you can probably find paid plug-ins (or maybe

create one yourself). But I'm afraid you will be stuck with that for a long time. Because editing embedded text is not a simple task, Adobe simply never considered making this as a feature or using that kind of technology (although embedded text exists in the PDF standard), i.e. it's only for PDF export purposes. The simplest way is probably to use Photoshop or a similar image editing software to convert the PNG/JPG into something else, e.g. bitmap. Every year thousands of people visit our plant to get their first job and take home a good salary. At the end of the summer we welcome everybody to our plant for a break. We call it our Company Picnic! During the picnic every colleague of CSR will serve something from the

family that came from Albania. They will entertain you with their warm welcome and delicious food. That's our way of saying Thank You for your work and good memory. This year it will be held on the 25.6 at the edge of the Mojkovac Amphitheater.Q: Showing no. of people a person sees on facebook in android My requirement is to create a view, that shows how many people a person has seen on facebook in the last 12 hours. I am able to see number of people that I am seeing who was my friend or someone who was tagged in my photos. But, What I want is the number of people who has seen me and added me in his/her list of friends or watched my profile. Now the problem is we don't have a table for friends in

facebook. We have a table for friends and we can see those people who are friends with me. So, how to get all the people who are seen me and I am seeing and who are in my friends. Any one can help me. A: I know this is an old post
