Autorun Action Flash Crack +

Autorun Action Flash is a small, yet powerful tool, that will help you to automatically run your CD title as a splash screen. If you ever need to run your program without user interaction or without the "Windows Xp" login screen, then you must need this tool. It also helps in loading your files after the splash screen is over. Autorun Action Flash is simple to use. Just pick any CD you want to load, and the Splash Screen Maker will let you select the image or title, as well as the size and duration of the splash screen. Note: You need to load your images into this editor. Just select an image and click "Open" in order to load it. When you're done, simply hit the "Save" button. You can adjust the placement and size of the image on the splash screen, and you can also change the animation. When you're happy with the settings, hit the "Finish" button to save them. If you have any problems, just go to the Help page, or you can contact the author. Autorun Action Flash Features: Create a splash screen for your CD discs. Automatic or manual operation. Select image from computer or load one from the CD. Add music to the CD if needed. Set the duration of the splash screen. Select animation style (up and down once, scroll up once, play once).
