OfficeOne PowerPoint VBA Controls Assistant 09e8f5149f

OfficeOne PowerPoint VBA Controls Assistant

- PPVBA is an Addin for PowerPoint which provides a list of VBA controls that are available on the slides of your PowerPoint presentation.
- PPVBA is fully integrated with VBA code editor and also synchronizes the objects on the slides with your code.
- PPVBA can be used to create a presentation from scratch using available controls or can simply be used to update the controls already defined in the slide.
- PPVBA uses VBA's event firing abilities to update the controls in the editor window and to interact with the slide controls.
- PPVBA requires a PowerPoint 2010/2013 installation.
- PPVBA is a COM addin and needs to be registered on the user computer before use.
- PPVBA requires Microsoft Access Runtime (MDAC).
- PPVBA requires a valid Office installation.
- PPVBA requires Excel/Access for Windows.
- PPVBA is a 32-bit (x86) application.

Requirements: PowerPoint 2010 PowerPoint 2013 MS Access 2010 MS Access 2013 PowerPoint 2003 is not supported PowerPoint 2007 is not supported

PPVBA Installation Instructions (2):

- Download the PPVBA.xlam file.
- Double-click on PPVBA.xlam file to install PPVBA.
- On the Options Tab of PPVBA Options dialog, select the Help option.
- Once you click OK, you'll be prompted to restart the PowerPoint application.

PPVBA User Guide:

- Point and click to edit code in the code editor and synchronize the slide control with your VBA code.
- Point and click to drag and drop control from controls palette or standard palette to slide.
- Use keyboard shortcuts to quickly create, edit and synchronize controls on slides.
- Right-click on control in the controls palette, select the Synchronize control with VBA option.
- Click on the Options Tab to view the available controls and their properties and enter the values.
- If you want to change color of the control, you can do so by making your changes in the color palette.
- If you want to change font of the control, you can do so by making your changes in the Font palette.
- If you want to change the size of the control, you can do so by making your changes in the Size palette.
- If you want to change the control's effect, you can do so
