In FIFA 22, the most important elements of real-world football are integrated into the experience: multiple seasons, player and team dynamics, and authentic gameplay styles are all reflected in EA SPORTS' new digital competition. Finally, FIFA 22 includes the new "Ultimate Team" mode, which uses artificial intelligence to create gamers' team and field virtual players from a variety of real-world international leagues from across the world, as well as domestic leagues in various countries. All of these key innovations in FIFA 22 combine to make it the most authentic football simulation experience on any console platform. Available next week on Xbox One and Xbox 360, FIFA 22 will be available for pre-order on Xbox.com beginning today. Visit the EA SPORTS FIFA 22 FIFA 20 blog for information and updates. In recent years, many competitions have also demanded that video game manufacturers authentically represent the most realistic play on the field. FIFA 20 saw action in 23 nations and 20 stadiums around the world. In order to create a comprehensive, multi-venue experience, FIFA developers went so far as to create a prototype of more than 3,000 players, team tactics, formation changes, goalkeepers and substitution systems. The result was an impressive, immersive football experience that felt authentic across all levels of the game. While the realism of certain areas of FIFA 20, such as goalkeepers and goal calls, is excellent,
