There are probably at least ten different ways that some virus gets into your system and often you don't even know it was there. Viruses can sneak up on you. Just think of the diseases that are spread by touch alone without actually opening the package or file. How did you get the "monkeypox" virus? How did you get the lice? If you are a loner, someone might send you an e-mail with a virus that you click on without reading. What does the virus do? Viruses can do a lot of things. The virus can steal your identity, or destroy your files. It can overwrite your programs, or even your hard drive. Viruses can destroy your entire computer system. In rare cases, they can even alter the
