### What's New in the Photoshop Video App Download?

There's a trend in the National Football League these days: Quarterback legends. Three years ago, Steelers quarterback Ben Roethlisberger was still single. Three years from now, Roethlisberger — if he wins a third Super Bowl MVP title — will be married. There's Alex Smith, RG3 and a few others. In the past four years, eight quarterbacks have finished among the top 10 in passing yards and thrown at least five touchdowns. This year could be the most: The eight quarterbacks combined for 81 touchdowns. Of course, as good as those numbers are, they're not the strongest indicators. It's hard to pinpoint what offensive system was the problem — the Colts once had Manning throw the ball more than Manning — but what isn't hard to see is that Manning never gets his team in a position to win. He doesn't get his team in a position to win ... never really has. Now, two years later, Manning has improved in some ways, but it's not like he's become a better player, and it's not like he's turning back to throwing it more. In the Colts' most recent game, Manning went 21-for-35 for 260 yards and no touchdowns in a loss to the Browns. That's the same seven touchdowns that he threw in
